points.

The recovery was supposed to come from the trading class of operators, who had bought sparingly under the impression that speculation would revive this week with the passing of the who had bought sparingly under the impression that speculation would revive this week with the passing of the three-day holiday. July settlements and other influences of restraint on last week's markets. The houses which did this selling and the concentrated form it took gave an impression of coming from influential sources. Its sentimental effect, therefore, was considerable. London joined in this selling, especially United States Steel. The persistent heaviness of that stock has a depressing effect on sentiment towards the whole list. Foreigners showed some renewal of uneasiness over the copper trade situation. The price of copper warrants fell sharply in London, and quotations for the metal were marked down at the metal exchange in Now York.

Reports of rapidly-expanding activity by the electrical equipment companies with corresponding deman for copper did not prevent a weak tone in the copper industrials. There were a number of stocks, regarding which speculative predictions have falled, leading to reselling by disappointed buyers. This was true of Wabash preferred, which has been the subject of reports diligently circulated of a coming passing of control to a stronger company, with a guarante of dividends. United States Steel suffers in the same way from the long-drawn out claims in behalf of the project for listing on the Paris Bourse.

A sharp upturn in the wheat market following reports of heavy rain in the region where harvesting is fa progress, suggested a fear that the expected good effect of to-morrow's government crop report would be neutralized in that way. Some dissatisfaction was expressed by sellors of stocks over the progress of the tariff bill at Washington and the growing bellef that the corporation earnings tax will be incorporated and the resolution that the conference between the two Houses on the bill would see these measures eliminated and a stimulated effect on the speculation was expected from this looked-for action.

The principal sustaining factor in the market was the steady accumu

for action.

The principal sustaining factor in the market was the steady accumulation of Southern Pacific and an effective demand for one or two of the rorn-carrying railroads, notably Atchieon and Rock Island.

RICHMOND GRAIN MARKET.

RICHMOND GRAIN MARKET.

CHICAGO, July 7.—Unfavorable weather for harvesting in this country prompted active buying of wheat on the Board of Trade to-day, which resulted in a recovery of a large part of the, loss sustained during the previous sesion, final quotations showing net gains of 1½ to 1½ @ 1½c. Corn and oats also, closed strong, but provisions were weak.

Wet weather over a large part of the winter wheat belt inspired a brisk demand, which was in evidence throughout the entire session. The principal demand was for the deferred months. The market was also bullishly affected by the poor response of the Liverpool market to the severe alump yesterday and by a decided improvement in export demand. The total export business reported to-day aggregated sixy-five boatloop. The corn market was weak at the start because of favorable crop reports and increased local receipts, but railled before the end of the first hour and continued stronger the remainder of the day. The severe break in the price of cash corn yesterday stimulated a lively demand to-day for the cash grain by Eastern shippers and sales of 555,000 bushels were reported to have been closed. The market closed strong at almost the highest point with prices up ½ % to ½ % c, compared with the precious close.

Oats were trong all day, owing to active buying, based on unfavorable crop reports.

cious close.

Oats were trong all day, owing to active buying, based on unfavorable crop reports. A feature o firading was the purchase of approximately 2,000,000 bushels by a leading local covern. The market closed strong with prices % 674c. above yesterday's final quo, tatloss. Realizing by lending longs, due to a de-lender of 1970-5c. In the price of live hogs, caused weakness in the provisions market. The volume of trade was rather small, Prices at the close were unchanged to 15c, lower.
